DETAILED ACTION

Claim Objections

Claims 1-11 are objected to because of the following informalities: In claim 1, line 1, "said LED" lacks antecedent bases in the claim. Also, in claim 1, line 3 "an" should be changed to "a". Appropriate correction is required.

Allowable Subject Matter

Claims 1-11 would be allowable if rewritten or amended to overcome the objection as set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or suggest a vehicular lamp having an optical member that forms light from a LED light source into parallel light fluxes, and a reflector that reflects said parallel light fluxes, traveling from said optical member, in a forward direction of the lamp and allows said parallel light fluxes from said optical member to undergo internal reflection in said reflector so as to be reflected in said forward direction of the lamp. The vehicle lamp of such arrangement as set forth in claim 1 was not found in the prior art of record.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Amano (US Pat. No 6,814,475) discloses the claimed invention but fails to teach that parallel light flux to undergo internal reflection in the reflector.
